Judgement

Excellence in idea: Nominations will be based on thequality of the idea.

- **Excellence in Visual Art:** Nominations will be based on the quality and impressiveness of each Entered Game's appearance and visual effects.
- **Excellence in Audio:** Nominations will be based on the quality and impressiveness of each Entered Game's music and sound effects.
- **Excellence in Design:** Nominations will be based on the quality and execution of each Entered Game's design, including game mechanic design, level design, and difficulty balancing.
- **Best Student Game:** Nominations will be based on the overall quality, impressiveness and enjoyability of the Entered Game.
- **Audience Award:** Public voters will vote for their favorite - the game with the most votes will win the award.

Best marketing award: Nominations will be based on the marketing plan of the game.

WINNER SELECTION PROCESS:

Finalist games will be further evaluated by a panel of jurors appointed by the Sponsor (the “Finalist Committee”). Members of the Finalist Committee may include independent and 'mainstream' professional game designers, indie-friendly video game specialists and other individuals familiar with video game design and will be chosen for their professional specialization or other suitability in each Category.
A student must send video to his game before the competition date.

Game topics:

- Creative story
- Mind game
- Sport game
- Arab scientist game
